From: Bill Decker, Vice President, R & D Operations

Re: Product Hazardous Communications

In an ongoing effort to assure your satisfaction and safety, Neschen Americas has reviewed our current laminating film and adhesive product lines with regard to Hazardous Communications Requirements as mandated by OSHA. The regulations and supporting information is detailed in the Federal Register and available on the OSHA website at <http://www.osha.gov/> under the standards section, 29 CFR 1910.1200, "Hazard Communication."

As a result of our review, effective January 1, 2004, we will no longer be issuing Material Safety Data Sheets (MSDS) for the Laminating Film and Adhesive Film product families, see Appendix A. We have considered the variety of issues associated with the use and nature of these products and believe that it is appropriate to consider them articles as defined by OSHA. Most importantly, as articles they do not contain materials that may give cause for hazard communications.

We hope that this information is helpful as you communicate with your employees and customers. Neschen Americas is committed to providing safe and innovative solutions for the Graphic Arts marketplace.
